

THE CENTRAL COAST ASTRONOMICAL SOCIETY PRESENTS...

“Einstein for Everyone”

By Dr. Robert Piccioni, who is a graduate from Caltech, has a Ph.D. in high-energy physics from Stanford, was on the research faculty of Harvard, is “Teacher of the Year” at the Osher Institute, and is the author of two award-winning books.

How did a young rebel, who seemed doomed to fail, overcome rejection and become the world’s most famous scientist, with discoveries that impact our lives through DVDs, GPS, digital cameras, computers, and smarter energy?

**Thursday, Oct. 28th from 7-9pm at
1515 Fredericks in San Luis Obispo.
This event is free and open to the public.**

Dr. Robert Piccioni graduated from Caltech, has a Ph.D. in high-energy physics from Stanford University, and was on the research faculty of Harvard University. He is an expert on Einstein’s theories and cosmology. Robert ran eight high-tech companies and holds patents in medical equipment, microelectronics, and smart energy. Since “retiring”, Robert’s mission is making science accessible. He is “Teacher of the Year” at the Osher Institute and hosts the online radio show “Guide to the Cosmos”. Robert is the author of two books that won national and international competitions for “Best Popular Science Book of the Year”: ***Everyone’s Guide to Atoms, Einstein, and the Universe*** explores the exciting discoveries of modern astronomy, physics, and cosmology; and ***Can Life Be Merely An Accident?*** examines the many exacting requirements for life and how extraordinarily improbable it is that they occurred by random chance.

The Central Coast Astronomical Society is a community service group that provides educational opportunities (star gazing events, public astronomy talks, and more) for anyone interested in learning about the universe, and most of which are free.
